# CONTENTS

**Volume 1** **1957**

Pages

BAER, REINHOLD, Classes of finite groups and their properties . . 115–187

BELLMAN, RICHARD, On some applications of dynamic programming to matrix theory . . . . . 297–301

BOAS, R. P., JR., Inequalities for asymmetric entire functions . . 94–97

CESARI, L. and FULLERTON, R. E., Smoothing methods for contours . . . . . 395–405

COHEN, I. S.† and ZARISKI, OSCAR, A fundamental inequality in the theory of extensions of valuations. . . . . 1–8

DAY, MAHLON M., Amenable semigroups . . . . . 509–544

ERDÖS, P. and RÉNYI, A., A probabilistic approach to problems of Diophantine approximation . . . . . 303–315

FELLER, WILLIAM, Generalized second order differential operators and their lateral conditions . . . . . 459–504

FORT, M. K., JR., Mappings on $S^1$ into one-dimensional spaces . . 505–508

FREUDENTHAL, HANS, Kompakte projektive Ebenen. . . . . 9–13

FULLERTON, R. E., with CESARI, L., Smoothing methods for contours . . . . . 395–405

GOLDBERG, K. and NEWMAN, M., Pairs of matrices of order two which generate free groups . . . . . 446–448

HALE, JACK K., On a class of linear differential equations with periodic coefficients . . . . . 98–104

HELLER, ALEX, Twisted ranks and Euler characteristics . . . . 562–564

HENRIKSEN, MELVIN and ISBELL, J. R., Local connectedness in the Stone-Čech compactification . . . . . 574–582

HEWITT, EDWIN and ZUCKERMAN, HERBERT S., The irreducible representations of a semigroup related to the symmetric group . 188–213

HUGHES, D. R., Generalized incidence matrices over group algebras . 545–551

HUNT, G. A., Markoff processes and potentials I . . . . . 44–93

———, Markoff processes and potentials II . . . . . 316–369

100522

Pages

IGUSA, JUN-ICHI, On a problem of Picard concerning symmetric compositums of function-fields . . . . . 105–107

ISBELL, J. R., with HENRIKSEN, MELVIN, Local connectedness in the Stone-Čech compactification . . . . . 574–582

LÉVY, PAUL, Fonctions aléatoires à corrélation linéaire . . . . . 217–258

MALLIAVIN, PAUL, Sur la croissance radiale d'une fonction méromorphe. . . . . 259–296

MARCUS, M., On subdeterminants of doubly stochastic matrices . 583–590

MARCUS, M., MOYLS, B. N., and WESTWICK, R., Some extreme value results for indefinite Hermitian matrices . . . . . 449–457

MONTGOMERY, DEANE, Finite dimensionality of certain transformation groups . . . . . 28–35

MORDELL, L. J., On Ingham's trigonometric inequality . . . . 214–216

MOTZKIN, T. S. and WALSH, J. L., Underpolynomials and infrapolynomials . . . . . 406–426

MOYLS, B. N., with MARCUS, M. and WESTWICK, R., Some extreme value results for indefinite Hermitian matrices . . . . . 449–457

NAGATA, MASAYOSHI, A Jacobian criterion of simple points . . . 427–432

NAKAI, YOSHIKAZU, On the characteristic linear systems of algebraic families . . . . . 552–561

NAKAYAMA, TADASI, On modules of trivial cohomology over a finite group . . . . . 36–43

NEWMAN, M., with GOLDBERG, K., Pairs of matrices of order two which generate free groups. . . . . 446–448

PRICE, J. J., Some duality theorems . . . . . 433–445

RÉNYI, A., with ERDÖS, P., A probabilistic approach to problems of Diophantine approximation . . . . . 303–315

SCOTT, W. R., Solvable factorizable groups . . . . . 389–394

TAFT, E. J., Invariant Wedderburn factors . . . . . 565–573

TATE, JOHN, Homology of Noetherian rings and local rings . . . 14–27

TAUB, A. H., Singular hypersurfaces in general relativity . . . . 370–388

TAUSSKY, OLGA, On matrix classes corresponding to an ideal and its inverse . . . . . 108–113

Pages

WALSH, J. L., with MOTZKIN, T. S., Underpolynomials and infrapolynomials . . . . . 406–426

WESTWICK, R., with MARCUS, M. and MOYLS, B. N., Some extreme value results for indefinite Hermitian matrices . . . . . 449–457

WOLFOWITZ, J., The coding of messages subject to chance errors . . 591–606

ZARISKI, OSCAR, with COHEN, I. S.†, A fundamental inequality in the theory of extensions of valuations. . . . . 1–8

ZUCKERMAN, HERBERT S., with HEWITT, EDWIN, The irreducible representations of a semigroup related to the symmetric group. . 188–213
